

# Case Study: *Data Centers Canada*

Data Center Canada selects BioLink BioTime to make it easier to track and control both access to their facilities and sensitive systems.

## Customer

### Location

Vaughan, Ontario, Canada

**DATA CENTERS CANADA**  
COLOCATION AND DISASTER RECOVERY FACILITIES

### Company Profile

Data Centers Canada partners with customers to provide reliable, secure data center solutions that improve business continuity and promote the growth of their IT infrastructure. The company builds and manages data centers within Canada delivering the level of security, service and network access businesses need to compete in the global marketplace.

### Needs

Biometric physical access control solution to protect both their facility and their private collocation cages.

## Solution

BioLink BioTime, delivered and implemented by our official distributor Bio-Metrica LLC, is an advanced biometric T&A and physical access control system allowing reliable, secure and privacy-protected identification of users by their fingerprints, proximity cards and/or PIN codes and passwords.

With biometrics, BioTime ensures businesses that only authorized personnel are allowed into areas they require access to and that their identity is verified by the fingerprint of the user.

**“We wanted to replace our existing system with one that would not only provide our facility with multi-factor secured entry, but also allow us to easily track whoever came in and out of any protected areas with one cohesive system. We’re happy with the level of integration that BioTime provides us”**

Paul Di Benedetto, Managing Partner, Data Centers Canada
